EXPERIENCE

Full Stack Developer (Java, React)

Menez Enterprises - Orlando, FL

October 2013 - January 2022

- Built web applications that are cross-device compatible and accessible, resulting in a load time that was 27% faster than the industry average.
- Improved efficiency by 25% by testing software for bugs and operating speed, fixing bugs, and documenting processes.
- Created a compatible, custom client dashboard, resulting in a 30% reduction in support tickets.
- Collaborated with UX/UI design teams and improved existing applications, increasing conversion rates by 20%.

Web Developer (PHP, Java, React)

G World Properties - Orlando, FL

Sept 2015 - April 2018

- Migrated websites from WordPress to React, resulting in a 2-minute increase in average user time on page, improved performance, and increased scalability.
- Collaborated closely with a six-person agile team to provide clients with end-to-end solutions.
- Created 80+ pages of detailed design documentation, unit test plans, and well-documented code that new junior engineers and interns could use.
- Developed extensive test coverage for all new features, resulting in a 30% reduction in agent complaints.

PROJECTS

- Issue Tracker - Full Stack Issue Tracking System built with React & Spring.
Client: github.com/menezmethod/kiwibug_frontend / Server: github.com/menezmethod/KiwiBugBack
- Inventory System developed utilizing Spring Boot and React.
(github.com/menezmethod/inventorysystemreact)
- Inventory System created developed using Java and JavaFX
(github.com/menezmethod/InventorySystem_JavaFX)
- Multi time-zone Scheduling Application developed using Java and JavaFX
(github.com/menezmethod/JSScheduleLG_java)
- Student Roster developed using C++
(github.com/menezmethod/StudentRosterLG_CPP)
- Mobile Semester Scheduling application developed using Java & Android Studio
(github.com/menezmethod/WGUSchedulerMobile)
- Personal portfolio website developed with React
(gimenez.dev)

METHODS

- Agile / Scrum
- SLDC
- TDD
