EXPERIENCE

Software Developer October 2013 – Present

Menez Enterprises - Orlando, FL

- Over 4+ years of professional experience in the development and deployment of various Object-oriented and web-based Enterprise Applications using Java/J2EE technologies frameworks like Spring (Boot, Cloud, MVC, ORM) and working on the complete System Development Life Cycle (SDLC).
- Expertise in Web development technologies like HTML5,, XHTML, DHTML, CSS3, XML, and React, Angular (TypeScript, Javascript).
- To authenticate and authorize REST API connections, JSON Web Tokens (JWT) were widely utilized.
- Developed product roadmap and participated in product management and business development activities.
- Collaborate with engineering teams by utilizing Git as part of our version control systems and by writing documentation.

Software Developer Sept 2015 - April 2018

G World Properties – Orlando, FL

- Work with advanced applications development technologies such as React, Node, MongoDB, MySQL, TypeScript, JavaScript, Python, Bootstrap, CSS, and HTML.
- Responsible for creating and maintaining architecture for Restful API using Spring Boot.
- Maintain various marketing websites utilizing WordPress, Drupal as well as the development of static pages.
- Training and development of tools with a pleasing visual design to improve processes while paying attention to detail.
- Turned the vision of the company to real web applications hosted in the cloud.

PROJECTS

- Issue Tracker - Full Stack Issue Tracking System built with React (Typescript) and Spring Boot, Security for the back-end.
- Client: https://github.com/menezmethod/kiwibug_frontend / Server: <https://github.com/menezmethod/KiwiBugBack>
- Inventory System developed utilizing Spring Boot and React (JavaScript) for the front end.
(<https://github.com/menezmethod/inventorysystemreact>)
- Inventory System created developed using Java and JavaFX
(https://github.com/menezmethod/InventorySystem_JavaFX)
- Multi time-zone Scheduling Application developed using Java and JavaFX
(https://github.com/menezmethod/JSScheduleLG_java)
- Student Roster developed using C++
(https://github.com/menezmethod/StudentRosterLG_CPP)
- Mobile Semester Scheduling application developed using Java & Android Studio
(<https://github.com/menezmethod/WGUSchedulerMobile>)
- Personal portfolio website developed with React (JavaScript)
(<http://gimenez.dev>)

METHODS

- Agile Software Development / Scrum
- SLDC

CERTIFICATIONS

- CIW User Interface Designer
- ITIL® Foundation Certificate in IT Service Management
- CompTIA A+
- CompTIA Project+
