EDUCATION

Bachelor of Science in Software Development   February 2021
Western Governors University, Salt Lake City, UT

TECHNICAL SKILLS

Databases: MySQL, PostgreSQL, Oracle, Microsoft SQL, MongoDB, NoSQL
Languages: HTML5, CSS3, JavaScript, TypeScript, PHP, Java, Python, C#, C++
Frameworks & Libraries: Spring, Django, React, Bootstrap 3 & 4
Testing: JUnit, Cypress, Enzyme, Selenium
Design: Adobe Photoshop, Adobe XD, Figma

EXPERIENCE

Software Developer   October 2013 – January 2022
Menez Enterprises - Orlando, FL

- Built web applications that were cross-device compatible and accessible, resulting in a load time that was 27% faster than the industry average.
- Improved efficiency by 25% by testing software for bugs and operating speed, fixing bugs, and documenting processes.
- Created and maintained SQL Server scheduled jobs for space maintenance and daily backups of system and user databases for ten clients at the same time.
- Created a compatible, custom client dashboard, resulting in a 30% reduction in support tickets.
- Collaborated with UX/UI design teams and improved existing applications, increasing conversion rates by 20%.

Software Developer   Sept 2015 - April 2018
G World Properties – Orlando, FL

- Websites were migrated from WordPress to React, resulting in a 2-minute increase in average user time on page, improved performance, and increased scalability.
- Investigated problem areas by analyzing system flow, data utilization, and work procedures. Identified 10+ problem areas
- Collaborated closely with a six-person agile team to provide clients with end-to-end solutions.
- Created 80+ pages of detailed design documentation, unit test plans, and well-documented code that new junior engineers could use.
- Developed extensive test coverage for all new features, resulting in a 30% reduction in agent complaints.

PROJECTS

- Issue Tracker - Full Stack Issue Tracking System built with React (Typescript) and Spring Boot, Security for the back-end.
- Client: https://github.com/menezmethod/kiwibug_frontend / Server: https://github.com/menezmethod/KiwiBugBack
- Inventory System developed utilizing Spring Boot and React (JavaScript) for the front end. (https://github.com/menezmethod/inventorysystemreact)
- Inventory System created developed using Java and JavaFX (https://github.com/menezmethod/InventorySystem_JavaFX)
- Multi time-zone Scheduling Application developed using Java and JavaFX (https://github.com/menezmethod/JSScheduleLG_java)
- Student Roster developed using C++ (https://github.com/menezmethod/StudentRosterLG_CPP)
- Mobile Semester Scheduling application developed using Java & Android Studio (https://github.com/menezmethod/WGUSchedulerMobile)
- Personal portfolio website developed with React (JavaScript) (http://gimenez.dev)

METHODS	CERTIFICATIONS
- Agile Software Development / Scrum - SLDC	- CIW User Interface Designer - ITIL® Foundation Certificate in IT Service Management - CompTIA A+ - CompTIA Project+
